Projects

Loan Application User Interface Live Demo — GitHub

- **Technologies:** React.js, JavaScript (ES6+), Tailwind CSS, React Router DOM
- Developed a scalable, component-based loan application interface using React.js.
- Implemented a multi-step form with real-time client-side validation to ensure accurate data collection.
- Configured client-side routing using React Router DOM for smooth navigation without page reloads.
- Built a dashboard to display loan application status and progress, enhancing overall user experience.

New Tech – Educational Institute Website Live Demo — GitHub

- **Technologies:** React.js, TypeScript (TSX), Google Sheets Query-based API, Tailwind CSS
- Built a production-ready React application for an educational institute using TypeScript (TSX) with a secure certificate verification feature.
- Integrated a query-based Google Sheets API to retrieve and display only one record at a time, preventing data leakage.
- Optimized application performance using lazy loading to reduce initial load time.
- Implemented SEO best practices and semantic HTML, resulting in strong Lighthouse performance and SEO scores.
